FROM:

.....

- A nucleus colony (nuc) is a good way to start beekeeping. A nuc is a small established colony of honey bees that, with luck, will make surplus honey in its first year.
- Each nuc will have about three pounds of bees, including a marked queen, three frames of brood, and two frames of honey and pollen in a light-weight, five-frame, Jester nuc box.
- **MAKE SURE TO RESERVE YOUR NUC!** Enter your gift card number at checkout.
